Ph: (07) 5549 0999 Fax: (07) 5547 6923 Email: info@thompsoncooling.com.au

Programmed Preventative Maintenance

- /// The air that you, your employees and or your customers breathe is an issue of health and responsibility.
- /// The quality of the conditioned air in your facility directly effects health, productivity and absenteeism.
- /// Thompson Cooling will plan and program a 'preventative maintenance schedule' specifically tailored for your air conditioning system.
- /// Thompson Cooling's preventative maintenance philosophy is based on the premise that you deserve to have an environment that is clean, quiet and comfortable at all times- cool when you want it cool and warm when you want it warm.
- /// Your air conditioning system is a long term investment. Any mechanical device must be regularly serviced and maintained to optimise performance, efficiency and ensure longevity - just like your motor vehicle.

The advantages associated with the regular servicing of your air conditioning equipment are.....

- /// Supported prolonged life expectancy of the machine.
- /// The maintaining of running cost to a minimum.
- /// Ensuring that your manufacturers WARRANTY remains valid.
- /// Compliance with relevant tenancy/lease criteria.
- /// Reducing the risk of system failure together with the high cost of breakdown repairs.
- /// Minimising the inconvenience and annoyance of system downtime.
- /// Assisting in the provision of a cleaner (healthier) environment.

Your next step is to contact our office and we will arrange for our service manager to compile and document a program to meet your requirements. All relevant information is then loaded into our customer care database.
